STUBAI 3703 Lifter and panel remover pry bar

ROBUST. POWERFUL. PRECISE.

Our new lifter and panel remover pry bar has been engineered to meet the highest demands in solid timber construction and formwork applications. The specially curved base plate ensures optimal leverage and maximum control when positioning and releasing elements, as well as during demolition work.

Crafted from premium tool steel and finished with a durable powder coating for extreme resilience – naturally **MADE IN AUSTRIA**.

NOVELTY!

Nr. 3703 Lifter and panel remover pry bar

Item No.	Weight	Length		EAN 9802793
3703 01	3330 g	1400 mm	1	960890

Extremely robust lifter and panel remover pry bar designed for solid timber construction, ideal for positioning elements and demolition work.

What makes our tool unique:

- Exceptionally durable and robust – perfect for heavy, long-term use.
- Versatile application: for nail removal, formwork dismantling, and thorough cleaning of various materials.
- Proven handling inspired by our felling lever and approximately 30% lighter than comparable models.
- Heat-treated front section made of high-quality steel and precision-engineered tubular steel handle.
- Thoughtfully designed geometry for optimal leverage with minimal effort.
- Equipped with a nail claw, nail slot, and ergonomic grip.
